

HYDROSOLS

Hydrosols, also known as hydrolates, floral waters, or plant waters, are the by product of the steam distillation process used to extract essential oils from plants. Hydrosols have a unique aroma and are less concentrated than essential oils. They can be used for a variety of purposes, including skin care, aromatherapy, cooking, and cleaning. Hydrosols are also considered safer and gentler than essential oils, making them a popular alternative for individuals who are sensitive to essential oils or prefer a milder product. Hydrosols should also be stored in a cool, dark place and used within six months to a year to ensure maximum freshness and effectiveness.

OUR COLLECTIONS

ALOE

Botanical Name: *Aloe Barbadosensis*

CHAMOMILE GERMAN

Botanical Name: *Matricaria Recutita*

EUCALYPTUS

Botanical Name: *Eucalyptus Globulus*

GERANIUM

Botanical Name: *Pelargonium Graveolens*

HOLY BASIL

Botanical Name: *Ocimum Sanctum*

JASMINE

Botanical Name: *Jasminum Grandiflorum*

LAVENDER

Botanical Name: *Lavandula Angustifolia*

NEROLI

Botanical Name: *Citrus Aurantium*

ROSE

Botanical Name: *Rosa Damascena*

SANDALWOOD

Botanical Name: *Santalum album*

TEA TREE

Botanical Name: *Melaleuca alternifolia*

YLANG YLANG

Botanical Name: *Cananga Odorata*
